

John Godwin Signature
Crappie Tower Assembly

1. Insert all short (46") limbs into 20" trunk: insert one limb at a time into outer V-shape and **angle tip down slightly** as you insert into V-shape directly across trunk.
2. Secure 60" trunk to coupler with four 1" screws. Be sure the trunk is positioned upright where slits appear as "V" shapes.
3. Insert long (60") limbs into 60" trunk section.

Product needs weighting. We recommend our concrete block adapter to easily attach a concrete block to our single products.

Do not place in swimming or boating areas. Check your local game laws.
See product assembly online at MossbackFishHabitat.com.
